To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Immune – Boosting Nutrients

Submitted by: Beatrice Ramsey

IT is very important to be conscious of what you are putting inside your body. Especially, when you are surrounded by a respiratory virus, your body's immune system needs all the help it can get, to fight off the illness. Keep your immune system healthy, don't skip meals.

Believe It or Not:

There are certain foods that contain antiviral immune boosting properties, helping your body prevent a viral infection. **Garlic and onions** are powerful foods that are packed with strong flavors and smells. They have anti-fungal, anti-inflammatory, and anti-bacterial benefits. Essentially, they have sulfur containing molecules that help the body's system fight germs. They can reduce the length and severity of flu symptoms by increasing the activity of natural killer cells.

Ginger targets viruses found in the common cold and flu. Also suppress coughing and contains anti-inflammatory gingerols that can fight infection. It is also useful to calm the stomach and reduce nausea.

Citrus fruits such as grapefruits, oranges, lemons / limes, and kiwis are filled to the brim with flu fighting vitamin C. This vitamin help shorten symptoms, boosting both blood circulation and immunity.

Mushrooms add flavor to your salad, have antiviral and immune boosting properties that can help fight the flu virus. Other benefits include stress reduction and provide the body with anti-inflammatory and antioxidants agents.

Water / fluids, drinking water does more than just quench your thirst. It is essential to keeping your body functioning properly and feeling healthy. It regulates body temperature. Everyday a person loses eight to twelve cups of water through breathing, perspiring, urinating and bowel movements.
