Overcomers in 2021 (Part 5)

(Rom. 6:16-18). 16 Know ye not, that to whom ye yield yourselves servants to obey, his servants ye are to whom ye obey; whether of sin unto death, or of obedience unto righteousness? **17** But God be thanked, that ye were the servants of sin, but ye have obeyed from the heart that form of doctrine which was delivered you. **18** Being then made free from sin, ye became the servants of righteousness.

Therefore, we have the power to control ourselves and avoid sinful behaviors, and thus break bad habits and addictions.

Difference Between Habit and Addiction

Simply stated, an "addiction is a loss of control and freedom, while a habit is something that is donned or assumed, perhaps often, but that can nevertheless be removed if desired" (Britannica.com).

Anything that has control over us is an addiction. For example: If you must have coffee to function, it is an addiction; but if you freely choose to drink coffee every day, it is a habit.

Most Addictions are Sinful

Sinful behaviors are sinful, whether or not they're an addiction.

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

"Benefits of Getting the COVID-19 Vaccination"

Submitted by: Beatrice Ramsey

We understand that some people may be concerned about getting vaccinated now that COVID-19 vaccines are available in the United States. While more COVID-19 vaccines are being developed as quickly as possible, routine processes and procedures remain in place to ensure the safety of any vaccine that is authorized or approved for use. Safety is a top priority, and there are many reasons to get vaccinated.

Can a COVID-19 vaccine make me sick with COVID-19?

No. None of the COVID-19 vaccines contain the live virus that causes COVID-19 so a COVID-19 vaccine cannot make you sick with COVID-19.

Below is a summary of the benefits of COVID-19 vaccination based on what we currently know. CDC will continue to update this page as more data become available.

COVID-19 vaccination will help keep you from getting COVID-19

- All COVID-19 vaccines currently available in the United States have been shown to be highly effective at preventing COVID-19. Learn more about the different COVID-19 vaccines.
- All COVID-19 vaccines that are in development are being carefully evaluated in clinical trials and will be authorized or approved only if they make it substantially less likely you'll get COVID-19. Learn more about how federal partners are ensuring COVID-19 vaccines work.
