### Overcomers in 2021 (Part 7)

#### Stay Away from Sinful Behaviors

If we abstain from everything remotely connected with sin, abhorring even the thought of it, becoming addicted to sinful behaviors is slim.

For example: If you never take a drink of alcohol, you'll never become an alcoholic. If you never look at pornography, you'll never become addicted to pornography.

#### Exercise Self-Control

To avoid and overcome bad habits and addictions, we must exercise self-control and self-discipline. Jesus teaches us to deny ourselves and take up our cross and follow Him (**Matt.16:24**). To do this, we must control our mind, by which we control our bodies. He says, "For out of the heart come evil thoughts, murders, adulteries, fornications, thefts, false witness, slanders" (**Matt.15:19**).

Paul expresses these thoughts with an athletic metaphor, saying, "Everyone who competes in the games exercises self-control in all things. They then do it to receive a perishable wreath, but we an imperishable" (**1 Cor. 9:24-25**).

## Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

## HealthCare Ministry (Part 3)

### "Benefits of Getting the COVID-19 Vaccination"

Submitted by: Beatrice Ramsey

COVID-19 vaccination is a safer way to help build protection

- COVID-19 can have serious, life-threatening complications, and there is no way to know how COVID-19 will affect you.  
And if you get sick, you could spread the disease to friends, family, and others around you.
- Clinical trials of all vaccines must first show they are safe and effective before any vaccine can be authorized or approved for use, including COVID-19 vaccines. The known and potential benefits of a COVID-19 vaccine must outweigh the known and potential risks of the vaccine for use under what is known as an Emergency Use Authorization (EUA).
- Getting COVID-19 may offer some natural protection, known as immunity. Current evidence suggests that reinfection with the virus that causes COVID-19 is uncommon in the 90 days after initial infection. However, experts don't know for sure how long this protection lasts, and the risk of severe illness and death from COVID-19 far outweighs any benefits of natural immunity. COVID-19 vaccination will help protect you by creating an antibody (immune system) response without having to experience sickness.
- Both natural immunity and immunity produced by a vaccine are important parts of COVID-19 disease that experts are trying to learn more about, and CDC will keep the public informed as new evidence becomes available.
