## Grown and Evangelizing (Part 10)

**2. Boldness is a result of watching and partnering with other bold witnesses.**

Christians who faithfully share God's Word—God can entrust with more.

Those who do not, God cannot entrust with more. God will not give them more because they are not trustworthy. They will become like the Dead Sea which is dead because it has no ocean, sea, or tributaries to pour into.

Many Christians are like this. They read every Christian book they get their hands on and listen to all the famous preachers' sermons, but they will not share the gospel. When this happens, instead of growing, they actually start to decrease in faith. Christ said this:

"Consider carefully what you hear," he continued. "With the measure you use, it will be measured to you—and even more. Whoever has will be given more; whoever does not have, even what he has will be taken from him." (Mark 4:24-25).

Many Christians do not share and actually experience a taking away instead of receiving more blessings from Christ. It is crucial for us to share our faith not only for others to hear but also for our faith to grow.

## Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“COVID-19 symptoms and the Omicron variant: What the latest studies show” (Pt.4)

Submitted by: Beatrice Ramsey

The incubation period in both outbreaks also averaged around three days, shorter than the four to five days seen with the Delta variant.

Despite signs that Omicron leads to a lower individual risk of severe illness, it's so contagious that hospitals are struggling to handle the growing caseload. A consortium of disease forecasters warned Tuesday that the U.S. is on track to exceed the Delta variant's worst days of hospitalizations and deaths due to the sheer numbers of people who may catch the fast-spreading strain.

Scientists caution that Omicron's rapid ascent may be fueled in large part by more people spreading the virus with no symptoms at all.

One study of health care workers in South Africa, which has not yet been peer-reviewed, found the rate of people carrying the disease without symptoms had climbed from 2.6% during the Beta and Delta variant outbreaks to 16% with Omicron.

“These findings strongly suggest that Omicron has a much higher rate of asymptomatic carriage than other [variants of concern]
