From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (813) 451-0121.

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

Heart Health Awareness Month Part 4:

Submitted by: Beatrice Ramsey

Stroke: a common condition resulting from a decrease supply of oxygenated blood to the brain. There are several ways this can occur; the artery that supplies oxygen – rich blood to the brain becomes blocked and blood flooding from artery leakage or rupture. This cause increase pressure in the brain and damaging brain cells. There is a third condition known as a mini stroke. Occurring when the brain's blood supply is blocked for a short time, usually no more than 5 minutes. This type limits the damage that is done to the brain. It is important to recognize the signs of a stroke early. The sooner treatment begins, brain damage will be minimized or eliminated. Some of the main signs of a stroke includes speech difficulty, arm weakness, facial drooping and difficult with movements. **Remember:** to dial 911 as soon as you recognize the signs of a stroke.

Nutrition / Exercise: calorie information is based on a 2,000-calorie daily diet. However, you may need fewer or more calories depending on several factors: age, gender and level of physical activity. Limit daily consumption of saturated fats found in red meats, butter, cheese and whole – fat dairy products. Restrict your salt intake to avoid exceeding the recommended 2.3 grams daily. Exercise regularly to burn at least as many calories as you consume in your daily, for maintenance of a healthy weight. The foods you consume with a regular exercise program, can help you achieve a normal healthy lifestyle.

REMEMBER: It is very important to have a yearly complete physical examination by your physician. If you are 65 years or older with health problems, twice a year is recommended. Don't be afraid to talk with your doctor concerning your health problems. The information you give will determine what test or medication is needed to correct and prevent future health issues.
