## Grown and Evangelizing (Part 14)

Submitted by: Eric W. Doss

### A Mature Witness Should Expect Attack and Respond to It in a Godly Manner

Let us understand that if we are going to be faithful witnesses for Christ, this will stir up animosity towards us. "In fact, everyone who wants to live a godly life in Christ Jesus will be persecuted" (2 Timothy 3:12).

In the book of Corinthians, Paul was attacked by some false prophets who had turned many in the church against him. Look at some of the criticism Paul received: "For some say, 'His letters are weighty and forceful, but in person he is unimpressive and his speaking amounts to nothing'" (2 Corinthians 10:10).

They criticized his writing, his looks, and his speaking. Nothing was off limits, and these were people who he loved and served. If we are going to be faithful witnesses for Christ, we should expect attack.

In fact, if we are not receiving attack, whether through persecution, criticism, or even spiritual warfare, I would be concerned. Satan has no reason to attack somebody who is content on the side-lines not working for God. But those who are faithful should expect attack to come, even at times from those they invest in most.

## Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“COVID-19 symptoms and the Omicron variant: What the latest studies show” (Pt. 7)

Submitted by: Beatrice Ramsey

"Seemingly subtle change in viral biology may have significant real-world effects on the nature of the disease that results from infection," says the University of Glasgow's Brian Willett.

Willett recently authored a study, which has not yet been peer-reviewed, of how Omicron infects the body's cells.

Delta was "fine-tuned" for infecting cells by fusion, Willett said, a mechanism by which the virus can fuse with the cell membrane. Omicron seems to prefer endocytosis, a process by which the virus is able to enter the cell to infect it. Each pathway requires different molecules that show up in different amounts depending on the cell.

"If the cells in the upper respiratory tract favor infection by endocytosis, then this is where Omicron will grow preferentially. In contrast, Delta may spread deeper into the lungs as it is able to infect the cells in this environment more efficiently," said Willett.
