Grown and Evangelizing (Part 15)

A Mature Witness Should Expect Attack and Respond to It in a Godly Manner

If we are serving God—speaking his Word—and by God’s grace we suffer criticism and attack, let it not weigh too heavily upon us. Yes, let us consider the criticism and evaluate it, for it might be God speaking to us. But, we also must realize that attacks from the enemy are common to those who speak for God. Let those who are faithfully serving the Lord and being attacked be encouraged—for this happened to the prophets and faithful men and women of God before us. Christ said this:

“Blessed are you when people insult you, persecute you and falsely say all kinds of evil against you because of me. Rejoice and be glad, because great is your reward in heaven, for in the same way they persecuted the prophets who were before you.” **(Matthew 5:11-12).**

This happened to the prophets before you, and it also happens to other faithful witnesses around the world today **(cf. 1 Peter 5:9)**. Let us therefore be encouraged.

Observation Question: How did Paul respond to these attacks from the brethren, and what can we learn from his response?

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

Can you get Long COVID after an infection with Omicron? (Part 1)

Submitted by: Beatrice Ramsey

Can you get long COVID after an infection with Omicron? It's too early for sure, but many doctors believe it's possible to have long-term effects from the Omicron variant of the virus.

Long COVID is usually diagnosed many weeks after a bout with COVID-19. Any long-lasting effects typically appear about 90 days after symptoms of the initial infection go away. Maria Van Kerkhove of the World Health Organization said.

Overall, some estimates suggest more than a third of COVID-19 survivors will develop some symptoms of **Long COVID**. Symptoms include fatigue, brain fog, shortness of breath, anxiety and other problems. The lingering illness is more likely if you've been hospitalized with COVID-19, but research shows it can happen even after a mild infection.

Omicron began its race around the world late last year. The variant generally causes milder illness than the Delta version of the coronavirus but has still overwhelmed hospitals.

Van Kerkhove said she hasn't seen any research indicating that the portion of COVID-19 survivors who get **Long COVID**, will change with the Omicron variant.
