Caring for Our Elderly Saints (Part 1)

Let's look at some creative ways that we as God's vessels, can care for our elderly in creative and meaningful ways as they age, and are sometimes placed in health care facilities (whether temporary or permanently) or are home bound. What can we do?

This is a very important subject, since the spiritual domain is one area that still provides room for growth during the senior years. The body may break down, but the spirit is still capable of expansion, renewal, or even new birth in old age. In spite of changes, losses and chronic health conditions, elderly people can continue to cultivate their relationship with God. The problem, of course, is that aging Christians often have trouble staying connected with spiritual support systems. To put it another way, it's hard for them to get the fellowship they need. This may be the issue that underlies your concern for your loved one, and we want to commend you for being perceptive enough to notice it and loving enough to take it on as a personal project.

Like all Christians, seniors need the companionship and encouragement of other believers if their faith is to be nourished and grow. Unfortunately, the older they get, the more difficult it is for many of them to stay involved with the local church. Some are too feeble to get to church.

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

Sick and Shut-In

Home Bound/Hospital

Queen Amos	Geraldine Anfield	Ingrid T. Anfield
Emery Ball	Rhonda Brown	Flint Carter
Alvin Davis	Earnestine Doss	Edward Gooding
Sandra Jones	James Kennedy	Alma Lee
Walter Lee	Gabriel Moreno	Zandra Smith
Gloria Terry	Florrie Thomas	Sonya Thomas
Yolanda Thompson	Irene Washington	Margaret Wiggins
Sharon Wiggins	Anna Wyche	Kermit Wyche

No Calls/Visitors

Mittie D. Fowler

Not Residing in Miami-Dade

Dora Ayala	Valerie Brown	Carolyn Cephas

“COVID-19 Could Increase Dementia, Other Brain Disorders for Decades to Come” (Part 5)

Submitted by: Beatrice Ramsey

Neuroscientists, meanwhile, are doing what they can and focusing their efforts on ways of intervening early in the onset of COVID-19 with treatments that minimize long-term damage to the brain. Once patients have lived for months or even years with the syndrome, treatment is more difficult. “That’s what we’d like to avoid,” says Dr. Walter Koroshetz, director of NINDS. “The sooner you can intervene, the greater effect your intervention is likely to have. People who are two and three years out and are still sick, it’s a tougher road.

A Landscape of Devastation

The connection between chronic neurological conditions and infectious viruses has long mystified scientists. In the wake of the 1918 Spanish Flu, an estimated 1 million people worldwide developed a mysterious, degenerative neurological syndrome known as encephalitis lethargica, which caused Parkinson-like muscle rigidity, psychosis and, in some cases, a zombie-like state. Neurologist-author Oliver Sacks featured the syndrome in a book that was the basis for the 1990 film *Awakenings*. The cause of its condition, which lingers for decades, is still not fully understood.

LADIES' TRAINING CLASS 4/11/2021

Instructor: Zoe Madison 10:30 AM

“The Shulammitte Woman”
