

April 9, 2023 Vol. 15
Senior Minister, Evangelist Eric W. Doss

MISSION: "To proclaim and teach the message of Jesus Christ, live for God, love one another and minister faithfully to people."

MEMORY VERSES: "God is our refuge and strength, a very present help in trouble." **Psalms 46:1**
"Humble yourselves therefore under the mighty hand of God, that He may exalt you in due time: Casting all your care upon Him; for He careth for you." **1 Peter 5:6 & 7**

MOTTO: GOD LOVES YOU AND WE LOVE YOU TOO!

April Focus THEME: Mission Minded

From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (813) 451-0121.

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

Candida Auris

Submitted by: Beatrice Ramsey

Candida Auris (C. Auris) a deadly fungus, has been spreading rapidly throughout the United States healthcare facilities. This fungus can cause severe illness in people with weakened immune systems. The number of people diagnosed with this infection and the number of those found to be carriers, has been rising at an alarming rate, according to the CDC. The increases especially in the most recent years, are truly a major concern to us. The recent report gives information on areas of ongoing transmission from hospitals / nursing homes and medical outpatient care.

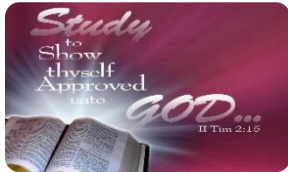

The fungus can be found on the skin and throughout the body, according to the CDC. It's not a threat to healthy people. However, this infection will occur in extremely ill individuals, usually sick with a lot of other health issues. When they come in contact with a carrier will become infected. The term colonized means a person not ill but will carry the germ on their bodies with the potential of transmitting it to others who might be more vulnerable to this fungus. Colonization is a place where the fungus multiplies, if left untreated. People with blood diseases, cancer, diabetes, who receives lots of antibiotics or those with tube devices going into their bodies. For example – breathing and feeding tubes, catheters in a vein or urinary catheter. They are at a high risk for becoming severely infected.

Symptoms may not be noticeable because people infected with C. Auris are often already sick with symptoms from another serious illness or condition. The symptoms vary depending on the area affected by C. Auris. For bloodstream infections, the common symptoms are fever and chills. To prevent C. Auris, people should regularly wash hands with soap and water or use an alcohol – based hand sanitizer = only if hands are not visible soiled. If you recently brought your family member home from a hospital or nursing facility, remember C. Auris can live on surfaces outside the body such as walls, tabletops or bed frames. Regular cleaning, environmental area with disinfection is helpful
