## Grown and Evangelizing (Part 21)

### A Mature Witness Has the Right Motives

We see throughout the bible, people had wrong motives, but God blessed their ministries anyway. Jonah hated the people he preached to in Nineveh and was angry at God, and yet, the Lord still brought a great revival. The false prophet Balaam prayed a blessing upon Israel and through the Holy Spirit gave a prophecy about the messiah, and yet he still worshiped another god.

**Application Question:** Why does God use and often bless those serving in ministry even though they have wrong hearts?

The primary reason God many times prospers their ministry is because God is committed to honoring his Word. Paul said the gospel is the power of God unto salvation to the Jew first and also to the Greek (**Romans 1:16**). In **Isaiah 55**, God says he watches over his Word. It is like water and dew, and it will never return void.

As the rain and the snow come down from heaven, and do not return to it without watering the earth and making it bud and flourish, so that it yields seed for the sower and bread for the eater, so is my word that goes out from my mouth: It will not return to me empty but will accomplish what I desire and achieve the purpose for which I sent it. (**Isaiah 55:10 -11**)

## Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

## HealthCare Ministry Reducing COVID's Toll (Part 5)

### 3. Post-infection treatments

A knowledge gap is also hampering the distribution of Paxlovid — a post-infection treatment from Pfizer that seems to sharply reduce the chances a Covid illness will become severe. It is most effective when prescribed shortly after symptoms begin, but many Americans do not know it exists.

The good news is that Paxlovid has become more widely available in recent weeks. If you are in a high-risk group and get infected with Covid, you should immediately talk with a doctor.

One thing to keep in mind: The government has so far authorized Paxlovid only for high-risk people, like those 65 and older or those with serious underlying medical conditions. I know that many Americans, especially liberal Democrats, are nervous about their own Covid risk and may be tempted to seek out Paxlovid.

But the risk of developing severe Covid for most people who are boosted remains very low, as the chart showed. And the current supply of Paxlovid is not large enough to treat anywhere near everybody who gets infected, especially if cases rise. "Our supply is fragile," Dr. Scott Dryden-Peterson of Brigham and Women's Hospital in Boston told Bloomberg News.
