Grown and Evangelizing (Part 24)

Submitted by: Eric W. Doss

Application Question: Why does God use and often bless those serving in ministry even though they have wrong hearts?

Why don't we witness? It is because we don't love properly. Mature witnesses serve others out of love. Love means that it is not about me. It is not about what I get in return. Love can be criticized and hated, and it won't matter because love is only concerned with the object it loves. Love is not selfish—it is not concerned with self-interest. It is consumed with the glory of God and the good of others.

Application Question: How can we grow in love in order to become mature witnesses of Christ?

1. Love increases by prayer.

[First Thessalonians 3:12](#) says, "May the Lord make your love increase and overflow for each other and for everyone else, just as ours does for you."

Paul prayed for the love of the Thessalonians to increase. Love is increased by prayer. We should pray for our love to increase and also for our church's love to increase.

2. Love increases by an act of the will

[John 13:34](#) says, "A new command I give you: Love one another. As I have loved you, so you must love one another."

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“Bust Common COVID Myths and Learn Facts” (Part 2)

Submitted by: Beatrice Ramsey

2. MYTH: The natural immunity I get from being sick with COVID-19 is better than the immunity I get from COVID-19 vaccination.

FACT: Getting a COVID-19 vaccination is a safer and more dependable way to build immunity to COVID-19 than getting sick with COVID-19.

COVID-19 vaccination causes a more predictable immune response than infection with the virus that causes COVID-19. Getting a COVID-19 vaccine gives most people a high level of protection against COVID-19 and can provide added protection for people who already had COVID-19. One study showed that, for people who already had COVID-19, those who do not get vaccinated after their recovery are more than 2 times as likely to get COVID-19 again than those who get fully vaccinated after their recovery.

All COVID-19 vaccines currently available in the United States are effective at preventing COVID-19. Getting sick with COVID-19 can offer some protection from future illness, sometimes called “natural immunity,” but the level of protection people get from having COVID-19 may vary depending on how mild or severe their illness was, the time since their infection, and their age.

Getting a COVID-19 vaccination is also a safer way to build protection than getting sick with COVID-19. COVID-19 vaccination helps protect you by creating an antibody response without you having to experience sickness.
