

June 4, 2023 Vol. 23
Senior Minister, Evangelist Eric W. Doss

MISSION: "To proclaim and teach the message of Jesus Christ, live for God, love one another and minister faithfully to people."

MEMORY VERSES: "God is our refuge and strength, a very present help in trouble." **Psalms 46:1**
"Humble yourselves therefore under the mighty hand of God, that He may exalt you in due time: Casting all your care upon Him; for He careth for you." **1 Peter 5:6 & 7**

MOTTO: GOD LOVES YOU AND WE LOVE YOU TOO!

June's Monthly Theme: Edify to Glorify

From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (813) 451-0121.

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

SUNDAY MORNING WORSHIP, FOLLOWED BY SUNDAY SCHOOL ON June 4, 2023 - 8:00AM

Our thoughts and prayers are with those in their times of mourning.

SINUSITIS

Submitted by: **Beatrice Ramsey**

Sinusitis is inflammation and swelling of tissue lining your sinuses. Your sinuses are cavities in the skull that connects to your nasal passages by small channels. The channels let air flow from your nose into the sinuses after mucus is drained from every sinus into the nose. There are four sinus cavities located behind the cheek bone, in the middle of your forehead, between the ears and nasal cavity. The main function of the sinuses is the production of mucus, for lubricating the lining of the nose and coating the hairs of the nose with a sticking effect. This process helps to protect the nose from invasion of microorganisms inhaled from pollution, dust, and airborne germs. The purpose of the hair in your nose, during inhalation is to collect and block particles, that could make their way to the lungs. Your nose is an ideal environment for germs and sickness. It is very important to clean your nose daily. The most common way is blowing your nose and wiping with a clean tissue. Nasal irrigation is the most effective way of cleaning your nose.

DID YOU KNOW: Mucus and tiny hairs warm and humidify the air you breathe before reaching your lungs? Breathing in warm moist air is excellent for your health. However, breathing in **COLD AIR** can cause the onset of negative symptoms such as coughing, shortness of breath and wheezing. These symptoms can interfere with the normal flow of air. The production of thin mucus in the sinus, will help drain out pollutants from the sinuses into the throat. Once swallowed, these pollutants will be destroyed by your stomach acid. However, your sinuses may become blocked by viruses, bacteria or fungi causing swelling and inflammation. You may experience symptoms such as headaches, nasal congestion, snoring, mouth breathing, discolored or thick nasal discharged and loss of taste and smell. Treatments includes – nasal sprays, pain relief medication and antibiotics. **GOOD TO KNOW:** The sinuses are the body's air filtering system. Today we have studied another way of the body's defensive protection against harmful invaders.
