Grown and Evangelizing (Part 25)

Submitted by: Eric W. Doss

Application Question: Why does God use and often bless those serving in ministry even though they have wrong hearts?

2. Love increases by an act of the will

John 13:34 says, "A new command I give you: Love one another. As I have loved you, so you must love one another."

Love is not necessarily a feeling but primarily an act of the will. We grow in love by choosing to act in love towards people and God. Jesus said if you love me, obey my commands (**John 14:15**). We love God by obeying him. We love others by serving them. Consider what John said: "Dear children, let us not love with words or tongue but with actions and in truth" (**1 John 3:18**).

We grow in love by acting in love. Love is not primarily an emotion but an act of the will that may include emotions. We grow in love by choosing to serve, share, listen, forgive, etc. Love grows as we choose to act in love towards others.

Application Question: In what ways is God calling you to love others in order to be a better witness?

A Mature Witness Is Gospel-Centered

But what does it matter? The important thing is that in every way, whether from false motives or true, Christ is preached. And because of this I rejoice.

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“Bust Common Myths and Learn Facts” (Part 3)

Submitted by: Beatrice Ramsey

2. MYTH: The natural immunity I get from being sick with COVID-19 is better than the immunity I get from COVID-19 vaccination.

FACT: Getting a COVID-19 vaccination is a safer and more dependable way to build immunity to COVID-19 than getting sick with COVID-19.

COVID-19 vaccination causes a more predictable immune response than infection with the virus that causes COVID-19. Getting a COVID-19 vaccine gives most people a high level of protection against COVID-19 and can provide added protection for people who already had COVID-19. One study showed that, for people who already had COVID-19, those who do not get vaccinated after their recovery are more than 2 times as likely to get COVID-19 again than those who get fully vaccinated after their recovery.

All COVID-19 vaccines currently available in the United States are effective at preventing COVID-19. Getting sick with COVID-19 can offer some protection from future illness, sometimes called “natural immunity,” but the level of protection people get from having COVID-19 may vary depending on how mild or severe their illness was, the time since their infection, and their age.

Getting a COVID-19 vaccination is also a safer way to build protection than getting sick with COVID-19. COVID-19 vaccination helps protect you by creating an antibody response without you having to experience sickness.
