Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 4)

The world brushes aside the concept of sin by saying, "Hey, no problem! Don't worry about it, we all make mistakes!" But there is no acknowledgement or confession of sin.

In biblical forgiveness, the wrongdoer admits, "I sinned against you," and asks, "Will you forgive me?" The one wronged must respond by promising, "I forgive you." This is very different than just saying you're sorry or saying to the one who wronged you, "Hey, don't worry about it!"

Paul says that we are to forgive each other "just as God in Christ also has forgiven you." God didn't say, "Hey, don't worry about it, we all make mistakes!" He didn't just brush our sin aside. Rather, our sin renders us truly guilty before God's holy justice. We have violated His holy law. He requires that the penalty be paid. But in love, He sent His own Son to bear the penalty that we deserved. When the guilty sinner repents of his sin and lays hold of Christ by obedient faith, God graciously and totally forgives the debt of sin. He releases the sinner from the guilt of his sin.

“What Doctors Wish Patients Knew About the Johnson & Johnson Vaccine” (Part 3)

Submitted by: Beatrice Ramsey

Only one dose is needed

“The good thing about the Janssen vaccine is it’s one dose and you’re done,” echoed Dr. Fryhofer, a member of the AMA Board of Trustees. That means “you don’t have to go back for a second dose. You don’t have to make a second appointment. You can get fully vaccinated at one visit.”

Additionally, the J&J Janssen vaccine “can be stored at regular refrigerator temperatures and does not require dilution, which makes storage and administration easier,” she said. “Many clinicians had high hopes of using this vaccine in hard to reach geographical areas.”

Don’t compare the three vaccines

“Don’t get caught up necessarily on the numbers game, because it’s a safe and effective vaccine and what we need is to have as many effective vaccines as possible,” said Dr. Irons. Rather than focusing on efficacy rates, “accept the fact that now you have three highly effective vaccines.”

“These vaccines have not been tested head to head, so it’s impossible to do a really accurate comparison,” she said.
