

June 11, 2023 Vol. 24  
Senior Minister, Evangelist Eric W. Doss

**MISSION:** "To proclaim and teach the message of Jesus Christ, live for God, love one another and minister faithfully to people."

**MEMORY VERSES:** "God is our refuge and strength, a very present help in trouble." **Psalms 46:1**  
"Humble yourselves therefore under the mighty hand of God, that He may exalt you in due time: Casting all your care upon Him; for He careth for you." **1 Peter 5:6 & 7**

**MOTTO:** GOD LOVES YOU AND WE LOVE YOU TOO!

June's Monthly Theme: Edify to Glorify

**From the Minister's Desk**

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (813) 451-0121.

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

**Love gives us memories. Faith gives us strength. Our hearts and prayers are with our bereaved sisters and brothers in Christ.**

Our deepest heart-felt sympathy to the family of Thaddeus Livingston, who passed away on 6/2/2023. Praying for peace and comfort to everyone impacted by this loss.

### Viral Hepatitis: A, B, C, D, E

Submitted by: **Beatrice Ramsey**

Viral hepatitis is an infection that can cause liver inflammation and damage. Inflammation is swelling that occurs when tissues of the body become injured or infected. There are several different types of viral hepatitis, classified as A, B, C, D, E. Viral hepatitis A is a short-term infection which means, the immune system helps people by get better without treatment after a few weeks. It is spread by contaminated water or food involving an infected person with the virus. Viral hepatitis B in the acute phase, is a short-term infection. It may last for several weeks and in some cases, symptoms may last up to six months. In the United States, Asian Americans and African Americans have a higher rate of chronic hepatitis B than any other ethnic groups. This is due to sharing drug needles or having unprotected sex. Viral Hepatitis C can be acute or chronic infection. Although no vaccine for viral hepatitis C is available. There are medications that can cure most cases of viral hepatitis C. It is spread from person to person by infected blood contact. Viral hepatitis D is unusual because it can only infect you, when you have hepatitis B viral infection. In this way, hepatitis D is a double infection. You can protect yourself from getting hepatitis D, by getting the hepatitis B vaccine. Viral hepatitis D is spread the same way as viral hepatitis B, though contact with a person's infected blood or other infected body fluids.

Viral hepatitis E has different types that are spread in different ways. One way of spreading is by drinking contaminated water. This type is common in developing countries such as parts of Africa, Asia, Central America, and the Middle East. Another type is more common in developed countries such as the United States, Australia, Japan, parts of Europe and East Asia. This type is infected occasionally from eating under cooked pork or wild game such as deer or possum and shellfish. The greatest symptom they all have is jaundice – yellowing of skin and eyes.
