Grown and Evangelizing (Part 25)

Submitted by: Eric W. Doss

Application Question: What are some common things that take away your joy or give you joy? What does that say about what your life is centered on?

His life was gospel-centered. This made him an effective and mature witness for Christ—it made him a pioneer.

People who are the most effective witnesses are gospel-centered. That is where they get their joy. They get joy from seeing the gospel shared and accepted by others. They get a tremendous joy from supporting the work of missions financially and praying for the work of missions. Their joy is not tied to what they own or do not own but to the kingdom of God advancing. This is a gospel-centered person.

Where is your joy centered? What is your heart tied to?

Application Question: Why are so many of us not gospel-centered? Why is our joy not primarily in the gospel and its advancement?

The reason many of us are not gospel-centered is because we have a heart problem—a heart defect that affects our focus and our joy in the work of the gospel. Solomon said this: "Guard your heart for out of it flows the issues of life" (**Proverbs 4:23**). Because of this reality, Jesus commanded us to not store up riches on this earth in order to protect our hearts—in order to make our hearts kingdom-centered.

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

"Bust Common Myths and Learn Facts" (Part 5)

Submitted by: Beatrice Ramsey

3. MYTH: COVID-19 vaccines cause variants.

FACT: COVID-19 vaccines do not create or cause variants of the virus that causes COVID-19. Instead, COVID-19 vaccines can help prevent new variants from emerging.

Getting vaccinated yourself may also protect people around you, particularly people at increased risk for severe illness from COVID-19. Getting sick with COVID-19 can cause severe illness or death, and we can't reliably predict who will have mild or severe illness. If you get sick, you can spread COVID-19 to others. You can also continue to have long-term health issues after COVID-19 infection. Learn about why you should get vaccinated even if you already had COVID-19.

4. MYTH: All events reported to the Vaccine Adverse Event Reporting System (VAERS) are caused by vaccination.

FACT: Anyone can report events to VAERS, even if it is not clear whether a vaccine caused the problem. Because of this, VAERS data alone cannot determine if the reported adverse event was caused by a COVID-19 vaccination.

Some VAERS reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. Vaccine safety experts study these adverse events and look for unusually high numbers of health problems, or a pattern of problems, after people receive a particular vaccine.
