Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 7)

A. BIBLICAL FORGIVENESS IS THE DECISION.

Here are the Other Aspects of Forgiveness:

3. To refuse to think about the offense.

Thankfully, God is not in heaven rehearsing our forgiven sins every day! For us, this is one of the most difficult aspects of forgiveness, especially when the wrong was serious. But we must distinctly remember to forget past wrongs that we have chosen to forgive.

You must deliberately direct your thoughts to other things, such as how much God has forgiven you. To dwell on an offense that you have forgiven is to break your promise to forgive.

4. To refuse to talk to others about the offense.

If you say that you forgive someone and then tell others about the offense, you are trying to make the offender pay, which is not forgiveness. Or, you're trying to evoke sympathy or admiration from others at the offender's expense. When you forgive, you choose to drop the matter. The only exception would be if you fear that the offender may be trying to repeat his sin toward another person, who needs to be warned of the danger. For example, if someone has molested your child and you see him hanging out with another family with young children, it is appropriate to warn them to be on guard.

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“What Doctors Wish Patients Knew About the Johnson & Johnson Vaccine” (Part 6)

Submitted by: Beatrice Ramsey

Vaccine pause showed system's strength

“The AMA continues to encourage everyone who is eligible for COVID-19 vaccines to get vaccinated as soon as possible.”

Discover what physicians should know about the J&J vaccine and brain blood clots.

Which symptoms to look for

“After COVID vaccination, patients should expect flu-like symptoms, a mild to moderate headache, fatigue, fever, muscle aches,” Dr. Fryhofer said, noting that “these symptoms are expected and usually resolve within one to two days.”

“The risk of this concerning combination of blood clots and low platelets is rare but serious,” she said. “Patients who've had the Janssen vaccine should seek immediate medical attention if they develop shortness of breath, chest pain, leg swelling, persistent abdominal pain, neurological symptoms including severe or persistent headache or blurred vision, or petechiae beyond the site of vaccination.

PLEASE REMEMBER

1. **Stay home if possible**
2. **Wear a mask**
3. **Practice social distancing**
4. **Wash your hands often with soap and water for 15-20 seconds**

Please come by the building to pick up masks or face shields, if needed
