From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (813) 451-0121.

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

Thyroid Eye Disease: (TED)

Submitted by: Beatrice Ramsey

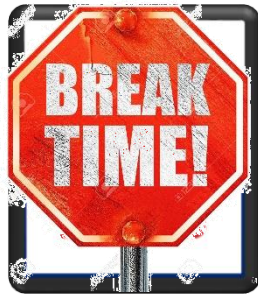

While watching our favorite TV programs, we are frequently interrupted with commercials. Of course, they give us abbreviated capital letters and we don't know what they mean. Immediately talking about medication and side effects, leaving us a little upset interfering with our programs. The awareness of health information is always good. Let's focus on one commercial -----Thyroid Eye Disease. (TED) is an autoimmune disease. **REMEMBER:** the immune system is designed to target and destroy invaders like bacteria, viruses, or fungus. With an autoimmune disease, any part of a healthy body can be mistaken as an invader. TED cause inflammation and damage to the tissues and muscles around the eye, interfering with normal vision. Unfortunately, thyroid eye disease happens more often in women than men. The median age for being diagnosed with TED is 43 years old. However, you can be diagnosed much earlier or much later than 43. Thyroid eye disease isn't contagious. This disease can't be transmitted from person to person.

SIGNS AND SYMPTOMS: Some symptoms of TED such as eye redness, excessive tearing, grittiness or foreign body sensation and light sensitivity, could be misdiagnosed as DRY EYE DISEASE. (DED) results from poor eye lubrication due to insufficient tear production. DED can be treated with over-the-counter artificial tears or gels; more severe cases will require surgery. Given the similarity with eye symptoms, it is important to visit your eye doctor. Especially those who may have pre-existing thyroid conditions. Other symptoms include eye bulging, double vision, difficulty closing your eyes completely and pain behind your eyes during movements. Symptoms normally affect both eyes, but sometimes you may notice symptoms only in one eye. TED can be treated with eye drops and anti-inflammatory medications. Your doctor may suggest selenium supplements if your blood levels of this mineral are low. Other things you can do to be more comfortable; apply cool compresses to your eyes, wear sunglasses outside, keep your head higher than your body when you lie down.

Dear God,
I come before you not on my own behalf. But for their own good. Bless the ones I love. Strengthen their faith. Let them live with contentment and rejoice in gladness. Protect them spiritually, physically, mentally, emotionally and in all ways that matter. Thank You and amen.
