## Grown and Evangelizing (Part 25)

Submitted by: Eric W. Doss

*Application Question:* Why are so many of us not gospel-centered? Why is our joy not primarily in the gospel and its advancement?

Paul's joy was seeing the Thessalonians in heaven. His heart was tied to the gospel. He lived a gospel-centered life, not primarily concerned with the temporary things of this earth but the things of heaven. Christ commands us to have a similar heart and passion. Look at what he said in **Luke 16:9**: "I tell you, use worldly wealth to gain friends for yourselves, so that when it is gone, you will be welcomed into eternal dwellings."

Christ said to use our wealth on earth to make friends in heaven. Christ says we should be motivated by this picture of people in heaven welcoming us and thanking us because we gave to the work of missions, and they came to know Christ because of it. Christ essentially said, "Make that your ambition—live a gospel-centered life."

In fact one time Christ had a very crude response for two disciples who put off the call of the gospel for something else. Look at Christ's interaction in **Luke 9:59-62**:

He said to another man, "Follow me." But the man replied, "Lord, first let me go and bury my father." Jesus said to him, "Let the dead bury their own dead, but you go and proclaim the kingdom of God."

## Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

### "Bust Common Myths and Learn Facts" (Part 5)

#### 5. MYTH: The mRNA vaccine is not considered a vaccine.

**FACT:** mRNA vaccines, such as Pfizer-BioNTech and Moderna, work differently than other types of vaccines, but they still trigger an immune response inside your body.

This type of vaccine is new, but research and development on it has been underway for decades.

The mRNA vaccines do not contain any live virus. Instead, they work by teaching our cells to make a harmless piece of a "spike protein," which is found on the surface of the virus that causes COVID-19. After making the protein piece, cells display it on their surface. Our immune system then recognizes that it does not belong there and responds to get rid of it. When an immune response begins, antibodies are produced, creating the same response that happens in a natural infection.

In contrast to mRNA vaccines, many other vaccines use a piece of, or weakened version of, the germ that the vaccine protects against. This is how the measles and flu vaccines work. When a weakened or small part of the virus is introduced to your body, you make antibodies to help protect against future infection.

#### 6. MYTH: COVID-19 vaccines contain microchips.

**FACT:** COVID-19 vaccines do not contain microchips. Vaccines are developed to fight against disease and are not administered to track your movement.
