Grown and Evangelizing (Part 25)

Submitted by: Eric W. Doss

Application Question: Why are so many of us not gospel-centered? Why is our joy not primarily in the gospel and its advancement?

Still another said, "I will follow you, Lord; but first let me go back and say good-bye to my family." Jesus replied, "No one who puts his hand to the plow and looks back is fit for service in the kingdom of God."

Christ essentially said this call must be first before all things; neither job nor duty to one's family can come before the call to preach the gospel. If it does, we are not fit for his kingdom. His disciples must be gospel-centered.

This is true for us as individuals, but it is also true corporately. It is very easy for churches to lose their focus on the gospel. Sometimes their focus can become worship, helping the poor, or some other social cause. All those things are important, but they are not more important than the gospel. Churches must be gospel-centered.

When the gospel is no longer the main thing, when it becomes assumed, the next generation may be lost. As evangelicals we must take note. All kinds of issues cry for our attention—abortion, pornography, media bias, economic justice, racial discrimination, classism, sexism, to name a few. And we need to be alert and involved in certain of them.

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“Bust Common Myths and Learn Facts” (Part 6)

Submitted by: Beatrice Ramsey

6. MYTH: COVID-19 vaccines contain microchips.

FACT: COVID-19 vaccines do not contain microchips. Vaccines are developed to fight against disease and are not administered to track your movement.

Vaccines work by stimulating your immune system to produce antibodies, exactly like it would if you were exposed to the disease. After getting vaccinated, you develop immunity to that disease, without having to get the disease first.

7. MYTH: Receiving a COVID-19 vaccine can make you magnetic.

FACT: Receiving a COVID-19 vaccine will not make you magnetic, including at the site of vaccination which is usually your arm.

COVID-19 vaccines do not contain ingredients that can produce an electromagnetic field at the site of your injection. All COVID-19 vaccines are free from metals.

8. MYTH: COVID-19 vaccines authorized for use in the United States shed or release their components.

FACT: Vaccine shedding is the release or discharge of any of the vaccine components in or outside of the body and can only occur when a vaccine contains a live weakened version of the virus.
