Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 9)

B. BIBLICAL FORGIVENESS IS COSTLY.

It cost God the death of His beloved Son. It will not usually cost us that much, but it still may be very costly.

I have read stories of parents who have forgiven the murderer or molester of their child. That is costly! At the very least, it costs us the time and effort to go to the offender and try to work on reconciliation. It does not happen automatically or when you are passive.

C. BIBLICAL FORGIVENESS IS UNDESERVED.

God forgives us by grace alone, which is undeserved favor. If someone has to earn it, it's not forgiveness. If you make him pay or do penance, it's not forgiveness.

D. BIBLICAL FORGIVENESS IS TOTAL.

God doesn't forgive just some of our sins, saving some others to bring up later when He needs some leverage against us! He forgives them all (**1 John 1:9**). So, we can't say, "I forgive you for this, but I'm not going to forgive you for that!" It must be total.

E. BIBLICAL FORGIVENESS IS FINAL.

God doesn't say, "If you do that again, I'm revoking your previous forgiveness!" He says (**Heb. 10:17**), "Their sins and lawless deeds I will remember no more."

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“What Doctors Wish Patients Knew About the Johnson & Johnson Vaccine” (Part 7)

Submitted by: Beatrice Ramsey

It prevents hospitalization

While J&J's vaccine has 66.3% effectiveness overall and 74.4% effectiveness in the United States, it has “100% efficacy against hospitalization and death from the virus,” said Dr. Irons. “That's really what we have to focus on.”

She noted that White House Chief Medical Adviser Anthony Fauci, MD, among other top experts, are “saying is that it's really important to focus on the severe end of the spectrum, preventing hospitalization and death.”

“No hospitalizations occurred in the vaccine group 28 days or more after vaccination as compared to 16 in the placebo group,” said Dr. Fryhofer. “There were also no COVID-associated deaths among those who were vaccinated. That's pretty powerful.”

Variants were spreading during testing

“When it came time for the Janssen vaccine trial, the background COVID incidence was higher,” said Dr. Fryhofer. “There were more variants circulating, including the variants of concern that can increase transmissibility and disease severity.”
