Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 10)

E. BIBLICAL FORGIVENESS IS FINAL.

God doesn't say, "If you do that again, I'm revoking your previous forgiveness!" He says (**Heb. 10:17**), "Their sins and lawless deeds I will remember no more."

To forgive someone is to dismiss the case against him. You can't bring it up again.

Much more could be said, but that gives us some understanding of the nature of biblical forgiveness.

But, how do we put it into practice? We need the right perspective or mindset:

2. To forgive others, we must understand the perspective needed for forgiveness.

Many Christian authors emphasize the benefits that forgiving others will bring to you. It's true, you will benefit by forgiving others. You will get rid of your bitterness, which eats at your soul. You will enjoy restored relationships with others, along with many other blessings. But, the benefits for you are really the by-products of forgiveness. Your focus should not be on what's in it for you, but rather on glorifying God and loving others.

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“What Doctors Wish Patients Knew About the Johnson & Johnson Vaccine” (Part 8)

Submitted by: Beatrice Ramsey

Variants were spreading during testing

“When it came time for the Janssen vaccine trial, the background COVID incidence was higher,” said Dr. Fryhofer. “There were more variants circulating, including the variants of concern that can increase transmissibility and disease severity.”

“When the Janssen vaccine was tested, it was at the height of the pandemic,” she said. “The variants of concern were out there, so the test for the Janssen vaccine was harder—you can’t compare them.”

“If you look at the Janssen vaccine, the efficacy did vary across geographic regions,” said Dr. Fryhofer. “In the United States, it was 74.4% effective. In South Africa, it was only 52% effective and that’s where that variant B.1.351 was dominant.”

Adenovirus vector vaccines aren’t new

“Janssen’s phase three clinical trial included more than 40,000 participants.
