### Why Does God Allow Good People to Suffer? (Part 15)

*When we experience Christ's sufferings and share in God's comfort, we are being equipped to minister to others who will experience similar afflictions:*

**3** Blessed be the God and Father of our Lord Jesus Christ, the Father of mercies and God of all comfort; **4** who comforts us in all our affliction so that we may be able to comfort those who are in any affliction with the comfort with which we ourselves are comforted by God. **5** For just as the sufferings of Christ are ours in abundance, so also our comfort is abundant through Christ. **6** But if we are afflicted, it is for your comfort and salvation; or if we are comforted, it is for your comfort, which is effective in the patient enduring of the same sufferings which we also suffer (**2 Corinthians 1:3-6**).

Paul says it as clearly as it can be said. His sufferings are intended for the Corinthians' comfort. Paul's comfort (in suffering) is for their comfort. The price Paul and his colleagues (**Silvanus and Timothy—1:19**) pay, as well as the comfort they receive, are for the benefit and blessing of the Corinthians. Suffering for Christ's sake is sure to bring us comfort from the heavenly Father. This comfort is given from our heavenly Father so that we might share it with others who will endure similar suffering.

If we fail in our suffering, doubting God's goodness and questioning His infinite wisdom and mercy, then we shall also fail to experience the comfort God has for us.

## Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

### HealthCare Ministry (Part 3)

Study Ties Blood Type to COVID-19 Risk:

**Blood Type “O” May Help, Blood Type “A” Hurt**

Submitted by: Beatrice Ramsey

There are four main blood types — A, B, AB and O — and “it’s determined by proteins on the surface of your red blood cells,” said Dr. Mary Horowitz, scientific chief at the Center for International Blood and Marrow Transplant Research. People with Type O are better able to recognize certain proteins as foreign, and that may extend to proteins on virus surfaces, Hari explained. During the SARS outbreak, which was caused by a genetic cousin of the coronavirus causing the current pandemic, “it was noted that people with O blood type were less likely to get severe disease,” he said. Blood type also has been tied to susceptibility to some other infectious diseases, including cholera, recurrent urinary tract infections from E. coli, and a bug called H. pylori that can cause ulcers and stomach cancer, said Dr. David Valle, director of the Institute of Genetic Medicine at Johns Hopkins University. Bottom line: “It’s a provocative study. It’s in my view well worth publishing and getting out there,” but it needs verification in more patients, Valle said. The Associated Press Health and Science Department receives support from the Howard Hughes Medical Institute’s Department of Science Education.
