### In Search of Wisdom (Part 2) From the Minister's Desk

#### The Pursuit of Wisdom

The entire theme of the book of Proverbs is this: pursue wisdom. With the tone of a father giving instructions to his sons, Solomon writes:

Listen, my sons, to a father's instruction; pay attention.... Do not forsake my teaching.... Get wisdom, get understanding.... Do not forsake wisdom.... Wisdom is supreme; therefore, get wisdom. Though it cost you all you have, get understanding.... Accept what I say.... I guide you in the way of wisdom. **Proverbs 4:1-11**

Verse after verse, the message is the same. Seek wisdom because it pays:

Blessed is the man who finds wisdom, the man who gains understanding, for she is more profitable than silver and yields better returns than gold. She is more precious than rubies; nothing you desire can compare with her. Long life is in her right hand; in her left hand are riches and honor. Her ways are pleasant ways, and all her paths are peace. She is a tree of life to those who embrace her; those who lay hold of her will be blessed. **Proverbs 3:13-18**

Wisdom is that quality that enables one to live a noticeably, recognizably outstanding life.

## Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“Omicron and BA.5: A Guide to What We Know” (Part 2)

Submitted by: Beatrice Ramsey

### Omicron: A spike in COVID-19 cases and potentially different symptoms

First, some background. Omicron was initially identified in Botswana and South Africa in November 2021—although later reports showed earlier cases in the Netherlands. On December 1, the CDC confirmed the first case in the U.S., in an individual in California who had returned from South Africa in November. By late December, Omicron was the predominant strain in the U.S. As people around the world welcomed a new year, Omicron continued to surge more quickly than any previous variant in many areas. Both the WHO and the CDC classified it as a “variant of concern.”

Early reports from South Africa indicated that most cases were mild—and that symptoms for this variant seemed to be different. “The reports show that patients in South Africa—many of whom were young—have had severe fatigue, but no loss of taste or smell,” says Lauren Ferrante, MD, a Yale Medicine pulmonologist.

But some people infected with Omicron still developed severe disease and had to go to the hospital, and some died. For that reason, experts continued to express concerns that a large volume of cases in a particular area could overwhelm medical centers, making it difficult to treat severe cases.
