### In Search of Wisdom (Part 3) From the Minister's Desk

#### The Pursuit of Wisdom

To fear the Lord is to hate evil; I hate pride and arrogance, evil behavior and perverse speech. Counsel and sound judgment are mine; I have understanding and power. By me kings reign and rulers make laws that are just; by me princes govern, and all nobles who rule on earth. I love those who love me, and those who seek me find me. With me are riches and honor, enduring wealth and prosperity. My fruit is better than fine gold; what I yield surpasses choice silver. I walk in the ways of righteousness, along the paths of justice, bestowing wealth on those who love me and making their treasuries full." **Proverbs 8:12-21**

What leader in his or her right mind would not want such a priceless tool? Why would we not heed wisdom's invitation? Imagine this wise and wonderful woman, gazing into your eyes and saying:

"Now then, my sons, listen to me; blessed are those who keep my ways. Listen to my instruction and be wise; do not ignore it. Blessed is the man who listens to me, watching daily at my doors, waiting at my doorway. For whoever finds me finds life and receives favor from the Lord." **Proverbs 8:32-35**

Could anything be more valuable to leadership than this?

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

#### “Omicron and BA.5: A Guide to What We Know” (Part 4)

Submitted by: Beatrice Ramsey

#### Is Omicron more transmissible—or deadlier—than previous variants?

The CDC says the presence of severity of symptoms can be affected by vaccination, history of prior infection, and age and other health conditions. Do current vaccines and treatments protect against severe disease from Omicron?

There is a third—and likely most important—question that has to do with how protective the existing vaccines will be against the new variant, says Dr. Murray. Experts are saying that the BA.4 and BA.5 subvariants seem to have the ability to elude some of the antibodies produced after vaccinations and infections, including those caused by some Omicron subvariants.

In late June, a committee of experts recommended the FDA update booster shots to target BA.5 and BA.4 subvariants of Omicron, with a plan to make such boosters available later in the year. (Experts acknowledge that could be a difficult task considering how quickly new variants emerge, especially if a new highly contagious subvariant emerges in the months to come.)

When they first started to study Omicron, scientists were concerned about a key distinguishing factor in the variant. Unlike Delta and other coronavirus variants, it carries an abundance of mutations—about 50 in all, including 26 that are unique to the variant
