In Search of Wisdom (Part 4)

From the Minister's Desk

The Pursuit of Wisdom

"Now then, my sons, listen to me; blessed are those who keep my ways. Listen to my instruction and be wise; do not ignore it. Blessed is the man who listens to me, watching daily at my doors, waiting at my doorway. For whoever finds me finds life and receives favor from the Lord." **Proverbs 8:32-35**

Could anything be more valuable to leadership than this?

The Provider of Wisdom

As with most things of value, however, wisdom is elusive, and it seems to be in short supply. Some people are crafty and shrewd, others are well-informed and highly educated, but few of us manifest the quiet depth of wisdom.

What is the secret and the source of wisdom? Job asked this question:

"But where can wisdom be found? Where does understanding dwell? Man does not comprehend its worth; it cannot be found in the land of the living. The deep says, 'It is not in me'; the sea says, 'It is not with me.' It cannot be bought with the finest gold, nor can its price be weighed in silver. It cannot be bought with the gold of Ophir, with precious onyx or sapphires. Neither gold or crystal can compare with it, nor can it be had for jewels of gold.

“Omicron and BA.5: A Guide to What We Know” (Part 5)

Submitted by: Beatrice Ramsey

Is Omicron more transmissible—or deadlier—than previous variants?

Unlike Delta and other coronavirus variants, it carries an abundance of mutations—about 50 in all, including 26 that are unique to the variant—and more than 30 on the spike protein, which is the viral protein that vaccines train the immune system to recognize and attack. Grubaugh said some of Omicron’s enhanced transmissibility could come from its ability to evade some immune responses, especially in people who were previously infected, but not vaccinated.

Scientists also wanted to know if these mutations indicated a possible reduction in the effectiveness of the COVID-19 vaccines and certain monoclonal antibody treatments. “We don’t really know how the mutations work together. Not everything is additive,” Grubaugh had said.

But in January, the CDC did report that a third vaccine dose, or booster, was “highly effective” at preventing the need for visits to urgent care or hospitalization due to COVID-19. In March, after some early evidence that prevention from the first booster shot was waning in older people, the U.S. approved a second booster for people older than 50 and those with certain immune deficiencies, giving those groups the option of another preventive dose.
