### In Search of Wisdom (Part 5)

From the Minister's Desk

#### The Pursuit of Wisdom

Coral and jasper are not worthy of mention; the price of wisdom is beyond rubies. The topaz of Cush cannot compare with it; it cannot be bought with pure gold.

"Where then does wisdom come from? Where does understanding dwell? It is hidden from the eyes of every living thing, concealed even from the birds of the air. Destruction and Death say, 'Only a rumor of it has reached our ears.' God understands the way to it and he alone knows where it dwells, for he views the ends of the earth and sees everything under the heavens. When he established the force of the wind and measured out the waters, when he made a decree for the rain and a path for the thunderstorm, then he looked at wisdom and appraised it; he confirmed it and tested it. And he said to men, 'The fear of the Lord – that is wisdom, and to shun evil is understanding.'" **Job 28:12-28**

According to this passage, only God understands the way to wisdom because he alone is the source of true wisdom. The wisdom of God is evident in the beauty, subtlety, richness, intricacy, variety and splendor of the created order, and it is also evident in the person, powers and perfections of the God of creation.

“Omicron and BA.5: A Guide to What We Know” (Part 6)

Submitted by: Beatrice Ramsey

**What you can do to protect yourself from Omicron, and BA.4 and BA.5**

People need to understand that variants like Omicron and BA.5 are a natural part of the progression of the virus, Grubaugh says. New variants aren't surprising, he says. “Delta was never going to be the last variant—and Omicron is not going to be the last one. As long as there is a COVID-19 outbreak somewhere in the world, there is going to be something new that emerges.”

Both Grubaugh and Dr. Murray say the best way to prevent new variants is to get vaccinated and get a booster shot, because if more people are fully vaccinated, it decreases the opportunity for the virus to spread and mutate.

Meanwhile, the BA.5 and BA.4 Omicron subvariants are still threats in the U.S., and experts continue to recommend following CDC infection prevention strategies.
