Why Does God Allow Good People to Suffer? (Part 20)

Suffering for the sake of Christ is not a curse but a blessing, if we respond as Paul does and as many other saints of old have done. Suffering is a stewardship, which we may misuse and misappropriate, or which we may utilize for our good and God's glory. Suffering draws us closer to God and closer to our brothers and sisters in Christ. Suffering always comes with the promise of divine comfort and thus provides us with the fuel for worship and praise.

The key to seeing suffering as we should is found in the Person and work of our Lord and Savior, Jesus Christ. From the outset of His ministry, Jesus made it clear that contrary to popular belief and teaching, suffering is indeed not a curse, but a blessing:

2 And opening His mouth He *began* to teach them, saying, **3** "Blessed are the poor in spirit, for theirs is the kingdom of heaven. **4** Blessed are those who mourn, for they shall be comforted. **5** Blessed are the gentle, for they shall inherit the earth. **6** Blessed are those who hunger and thirst for righteousness, for they shall be satisfied. **7** Blessed are the merciful, for they shall receive mercy. **8** Blessed are the pure in heart, for they shall see God. **9** Blessed are the peacemakers, for they shall be called sons of God. **10** Blessed are those who have been persecuted for the sake of righteousness, for theirs is the kingdom of heaven. **11** Blessed are you when *men* cast insults at you, and persecute you, and say all kinds of evil against you falsely, on account of Me. **12** Rejoice, and be glad, for your reward in heaven is great, for so they persecuted the prophets who were before you" (**Matthew 5:2-12**).

HealthCare Ministry (Part 4)

New Study Identifies 6 “Clusters” of COVID-19 Symptoms

Submitted by: Beatrice Ramsey

This is critical since resources are scarce and doctors are spread thin, especially in surge areas. Aegawa also says that being able to identify which cluster corresponds with your symptoms “may help patients seek care earlier if they find their symptoms put them into one of the high-risk” categories.

Dr. Matthew Exline, a pulmonary and critical care specialist at the Ohio State University Wexner Medical Center, tells Yahoo Life that the research is “very helpful,” including for patients with mild coronavirus symptoms. “A lot of patients, when they’re told they have COVID, there’s obviously a lot of anxiety. Appropriately, we focus on what’s the worst-case scenario — the dangers if you end up on a ventilator, things like that.” But knowing you’re in a low-risk cluster could help ease that anxiety. Doctors being able to say, “Hey, a lot of people with your type of symptoms end up not needing much [medical] help” is reassuring to patients and is very helpful,” he says. Both Exline and Aneqawa point out that the study, however, hasn’t been peer-reviewed.
