In Search of Wisdom (Part 7)

From the Minister's Desk

The Pursuit of Wisdom

Fearing the Lord relates to trust, humility, teachability, servanthood, responsiveness, gratitude and reliance on God; it is the exact opposite of autonomy and arrogance.

King David cried out to God: "Teach me your way, O Lord, and I will walk in your truth; give me an undivided heart, that I may fear your name" (**Psalm 86:11**). David knew that he could not fear God if he had a divided heart. If his loyalties were divided between this world and the world to come, he would not be able to truly fear God. Wisdom relates to developing an eternal perspective on life, and it can only come from God – the fountain of all wisdom.

The Priority of Wisdom

Wisdom includes the ability to use the best means at the best time to accomplish the best ends. It is not merely a matter of information or knowledge, but of skillful and practical application of the truth to the ordinary facets of life. James tells us, "If any of you lacks wisdom, he should ask God, who gives generously to all without finding fault, and it will be given to him" (**James 1:5**). Admitting we lack wisdom is a difficult but necessary first step on the road to skillful living.

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“Omicron Symptoms and Treatment: What to Know”

Submitted by: Beatrice Ramsey

2. Standout omicron symptoms are primarily respiratory

“Omicron is less likely to infect the lungs compared to previous variants,” Campbell said, adding that the infection can, however, progress to bronchitis or pneumonia.

While some other symptoms, such as lower back pain and night sweats, have been reported with omicron, Campbell said those symptoms are more indicative of the flu, and that there might be some case confusion given the peak cold and flu season.

People experiencing any of the above symptoms should get a COVID-19 test to be sure.

3. Immunity can account for some milder symptoms

Our bodies and their immune system response are adapting to mutations of the new omicron variant, Campbell and Johnson said.

“What’s different about omicron is that it has way more mutations in the spike protein than other variants,” Campbell said of the coronavirus’s entryway into the cells. “You’re going from 10 to 15 mutations in previous variants to over 30 mutations in omicron.”
