### In Search of Wisdom (Part 9)

From the Minister's Desk

#### The Pain of Ignoring Wisdom

How many of us have looked back across the ruins of failure and said, "I knew better. Why didn't I listen?" Solomon offers an essential fact about wisdom that scares the discerning reader into thinking twice about heeding wisdom's invitation:

Wisdom calls aloud in the street, she raises her voice in the public squares; at the head of the noisy streets she cries out, in the gateways of the city she makes her speech:

"How long will you simple ones love your simple ways? How long will mockers delight in mockery and fools hate knowledge? If you had responded to my rebuke, I would have poured out my heart to you and made my thoughts known to you. But since you rejected me when I called and no one gave heed when I stretched out my hand, since you ignored all my advice and would not accept my rebuke, I in turn will laugh at your disaster; I will mock when calamity overtakes you – when calamity overtakes you like a storm, when disaster sweeps over you like a whirlwind, when distress and trouble overwhelm you.

"Then they will call to me but I will not answer; they will look for me but will not find me. Since they hated knowledge and did not choose to fear the Lord, since they would not accept my advice and spurned my rebuke, they will eat the fruit of their ways and be filled with the fruit of their schemes.

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

### “Omicron Symptoms and Treatment: What to Know”

Submitted by: Beatrice Ramsey

#### 8. Some newer treatments can help, but come with caveats

For more severe cases of COVID-19, treatment using antiviral pills or monoclonal antibodies is an option.

However, Campbell and Johnson stressed that the treatments are in limited supply, are currently under FDA Emergency Use Authorization and are reserved for those at highest risk. They are also meant to be taken early on during infection.

As a result, these treatments are not available at a pharmacy. Monoclonal antibodies are also an IV infusion, meaning they are only given at an infusion center or an emergency room.

However, these treatments are effective at preventing serious hospitalization or death.

Previously in the pandemic, providers have been using a monoclonal antibody combination produced by Eli Lilly and by Regeneron (bamlanivimab with etesevimab and casirivimab with imdevimab, respectively) in severe cases of COVID-19.

The combination does not work against omicron, due to the mutations in how the virus attaches itself to human cells, Campbell said. “Fortunately, there is one antibody preparation, a monoclonal antibody called Sotrovimab that is made by GlaxoSmithKline, that does have full activity against Omicron,” he said.
