Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 22)

Submitted by: Eric W. Doss

A. BIBLICAL FORGIVENESS IS THE DECISION.

Here is the 5th Aspect of Forgiveness:

5. To be reconciled with the offender as far as is biblically possible.

. To say, "I forgive you, but I never want to see your ugly face again," is not to forgive as God forgives!

Of course, if the offender does not truly repent of his sin, we cannot be truly reconciled or in a close relationship. But even then, we are still commanded to love our enemies, do good to those who hate us, bless those who curse us, and pray for those who mistreat us (**Luke 6:27-28**).

So, biblical forgiveness is a decision to release the offender from the guilt of his sin, to refuse to bring up the offense to use against him, to refuse to think about the offense, to refuse to talk to others about the offense, and to be reconciled to the offender if possible. Also, to understand forgiveness we must realize that...

B. BIBLICAL FORGIVENESS IS COSTLY.

It cost God the death of His beloved Son. It will not usually cost us that much, but it still may be very costly.

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“The Delta Variant Unknown”- (Part 3)

Submitted by: Beatrice Ramsey

1. Expert opinion

Dr. Robert Wachter of the University of California, San Francisco, said: “I treat as if it might be a little more severe, but I don’t know that it matters that much.”

I can’t think of any public health decision that hinges on whether it’s the same or 20 percent worse.”

Dr. David Dowdy of Johns Hopkins pointed out that most people naturally assume Delta is more severe — because it is new, scary and more contagious. Given this bias, he advises assuming it is not more severe absent good evidence. He thinks it’s equally likely that Delta is slightly more severe or slightly less severe.

2. The research

The studies evaluating Delta’s severity have been frustratingly inconsistent. “There has been mixed evidence about whether it’s more severe or not,” Dr. Rebecca Wurtz of the University of Minnesota told me. “The final word is not yet in.”

Some research — like a study from Scotland — has found that the people who contract Delta get sicker on average than similar people who contracted an earlier version of the virus. Other evidence says otherwise.
