## Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 23)

Submitted by: Eric W. Doss

### B. BIBLICAL FORGIVENESS IS COSTLY.

It cost God the death of His beloved Son. It will not usually cost us that much, but it still may be very costly.

I have read stories of parents who have forgiven the murderer or molester of their child. That is costly! At the very least, it costs us the time and effort to go to the offender and try to work on reconciliation. It does not happen automatically or when you are passive.

### C. BIBLICAL FORGIVENESS IS UNDESERVED.

God forgives us by grace alone, which is undeserved favor. If someone has to earn it, it's not forgiveness. If you make him pay or do penance, it's not forgiveness.

### D. BIBLICAL FORGIVENESS IS TOTAL.

God doesn't forgive just some of our sins, saving some others to bring up later when He needs some leverage against us! He forgives them all (1 John 1:9). So we can't say, "I forgive you for this, but I'm not going to forgive you for that!" It must be total.

## Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

#### “The Delta Variant Unknown”- (Part 4)

Submitted by: Beatrice Ramsey

##### 2. The research

As Ariana Eunjung Cha of The Washington Post wrote: A recent technical paper out of Britain suggested the Delta variant does not cause more serious illness than its predecessors, but the analysis did not specifically break out children. David Rubin, a researcher at Children’s Hospital of Philadelphia who has been studying U.S. hospitalization data, said that in recent weeks, 1,200 to 1,400 children were inpatients at the peak, and while those numbers may be large, the rate of hospitalization remains the same as in the past at 0.8 to 0.9 percent.

Dowdy notes that the more alarming findings tend to receive more public attention, but that doesn’t make them more likely to be right.

##### 3. The topline data

The broad Covid data is probably the biggest reason to doubt that Delta is meaningfully more severe than earlier versions of the virus. The share of Covid cases leading to hospitalization seems to have held steady or even declined in recent months.

That’s true in Britain, including among children too young to be vaccinated. It’s true among both vaccinated and unvaccinated Americans in places that publish detailed numbers, like the state of Utah and the city of Seattle. And it’s true among the full U.S.
