Some Valuable Nuggets on Forgiveness Ephesians 4:32 (Part 26)

Submitted by: Eric W. Doss

C. REMEMBER THAT GOD IS THE SOVEREIGN OVER ALL THAT HAPPENS AND HE IS THE RIGHTEOUS JUDGE OF ALL.

When someone wrongs you, it helps to control your anger, root out bitterness, and make you ready to forgive if you remember that God has allowed this to happen for His purpose and your ultimate good (**Rom. 8:28**). When Joseph's brothers sold him into slavery, he could have become a very bitter young man. Instead, he chose to forgive his brothers. After their father died, they feared that now he would use his position of power to get revenge. But Joseph acknowledged God's sovereignty and goodness when he said to them (**Gen. 50:19-20**), "Do not be afraid, for am I in God's place? As for you, you meant evil against me, but God meant it for good in order to bring about this present result, to preserve many people alive." By the way, it is blasphemous to say that we must sometimes forgive God. We only must forgive those who wrong us, and the Judge of the earth always does what is right!

Prayer Request

Confess your faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

“COVID: The Threat in Perspective”- (Part 1)

Submitted by: Beatrice Ramsey

As a country, what can we do to protect older people from Covid? The data points to at least three good answers.

1. Reduce caseloads

The main reason that Covid deaths surged in the U.S. recently is that cases surged. If cases return to their low levels of the spring and early summer, deaths among older adults will probably plummet as well. In June, only about one-tenth as many Americans over 65 were dying from Covid as in August, according to the C.D.C.

Chart shows data from a sample of 16 U.S. jurisdictions. Source: Centers for Disease Control and Prevention

The most effective way to reduce caseloads is to continue raising the country's vaccination rate, through workplace mandates and other measures. Vaccinating children under 12 can also save the lives of older people.

Cases in the U.S. have already fallen 50 percent since Sept 1. If the declines continue — and can be maintained — the risks for older Americans will be much more manageable than they were in the late summer.
