### "Reasons to Fall in Love with Him" (Part 9)

If anybody ever deserved to forfeit the love of Christ it was His earthly disciples. They were men of inestimable spiritual privileges, yet they displayed an amazingly small degree of spiritual insight. Witness their behavior on the evening of the last Passover. The impending ordeal of bearing the world's sins was weighing heavily on the Lord's heart and He longed for their prayerful support. But Luke informs us that they were more interested in arguing about which one of them was the greatest (**Luke 22:24**).

None of them even extended the common social courtesy of the day by washing the others' feet when they entered the room for dinner. They probably were too busy competing for the seats of honor near the Lord. Later three of them fell asleep when they were supposed to be praying, all of them deserted the Lord when He was taken captive, one of them denied Him, and another one later doubted Him. Notice how this upper room episode began: "Now before the Feast of the Passover, Jesus knowing that His hour had come that He should depart out of this world to the Father, having loved His own who were in the world, He loved them to the end" (**John 13:1**). To the end of what? Who can really say? He will love us to the end of our waywardness and wanderings. He will love us to the end of our deepest need. He will love us to the end of our lives, to the end of time, to the farthest extremity of eternity. He will love us forever. His love is eternal.

### HealthCare Ministry (Part 1)

#### One in Five COVID-19 Patients Develop Mental Illness

Within 90 Days: Study Submitted by: Beatrice Ramsey

Many COVID-19 survivors are likely to be at greater risk of developing mental illness, psychiatrists said on Monday, after a large study found 20% of those infected with the coronavirus are diagnosed with a psychiatric disorder within 90 days.

Anxiety, depression and insomnia were most common among recovered COVID-19 patients in the study who developed mental health problems, and the researchers also found significantly higher risks of dementia, a brain impairment condition.

"People have been worried that COVID-19 survivors will be at greater risk of mental health problems, and our findings ... show this to be likely," said Paul Harrison, a professor of psychiatry at Britain's Oxford University.

Doctors and scientists around the world urgently need to investigate the causes and identify new treatments for mental illness after COVID-19,

"(Health) services need to be ready to provide care, especially since our results are likely to be underestimates (of the number of psychiatric patients)," he added.

The study, published in The Lancet Psychiatry journal, analyzed electronic health records of 69 million people in the United States, including more than 62,000 cases of COVID-19.
