"Reasons to Fall in Love with Him" (Part 12)

Love and obedience consistently go together in Scripture: "For this is the love of God, that we keep His commandments; and His commandments are not burdensome" (**1 John 5:3; cf. also John 14:15; 15:10**).

God will use every loving means at His disposal to encourage our obedience. He does that because He loves us. We discussed discipline when we studied God's holiness, but we cannot overlook it here. The writer to the Hebrews encouraged us not to regard God's discipline lightly. It is the evidence of His love for us (**Hebrews 12:5-6**). He knows that obedience to His Word will be for our greatest happiness, so He takes steps to help us want to obey Him. If He did not love us, He would not care about our happiness.

What kind of loving parents would we be if we let our children do anything they pleased, such as put their hands in the fire, ride their tricycles on the freeway, or play superman on the roof of the house? The authorities would probably declare us to be unfit parents. Our love constrains us, to discipline to ensure the kind of behavior that will bring our children future happiness. And that is exactly what our loving heavenly Father does.

He does not enjoy inflicting pain any more than we do. Before my father spanked me as a child, he used to say, "This is going to hurt me more than it hurts you." That was difficult for me to believe at the time, and I never understood it until I became a parent myself.

Prayer Request

Confess *your* faults one to another, and pray one for another, that ye may be healed. The effectual fervent prayer of a righteous man availeth much. **James 5:16**

80 Percent of Hospitalized COVID Patients Are Deficient in This Vitamin

Submitted by: Beatrice Ramsey

Bloodwork found that 82.2 percent of the group was deficient in serum 25-hydroxyvitamin D, AKA 25(OH)D, and that the group overall had lower levels of 25(OH)D in their system than the control group.

"One approach is to identify and **treat vitamin D deficiency**, especially in high-risk individuals such as the elderly, patients with comorbidities, and nursing home residents, who are the main target population for the COVID-19," study co-author **José L. Hernández**, PhD, from the University of Cantabria in Santander, Spain, said in a statement.

"**Vitamin D treatment** should be recommended in COVID-19 patients with low levels of vitamin D circulating in the blood since this approach might have beneficial effects in both the musculoskeletal and the immune system."

CONGRATULATIONS!
