To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Love gives us memories. Faith gives us strength. Our hearts and prayers are with our bereaved sisters and brothers in Christ. Praying for peace and comfort to everyone impacted by loss. Our deepest heart-felt sympathy

Our thoughts and prayers are with those in their times of mourning.

God didn't promise days without pain, laughter without sorrow or sunshine without rain. But He did promise strength for the day and light for the way.

Food Allergies

Submitted by: **Beatrice Ramsey**

All food allergies are caused by the immune system mistakenly identifies certain proteins found in food as harmful invaders. At this time the immune system, releases a variety of chemicals causing a series of symptoms. Such as: itching, skin redness, swelling of the throat and mouth, difficult breathing, dizziness and sudden drop in blood pressure. Symptoms usually occur within minutes up to an hour, requiring immediate care. A person with a history of allergy, hopefully will have an EPI- pen, for immediate injection of epinephrine to relieve symptoms. Peanut allergy has become more common among the human population. In serious cases, peanut allergy can lead to a life – threatening situation. Proteins that cause an allergic reaction, from peanuts can be present in a range of foods, such as cashews and pistachios. This is known as cross – reactivity and your doctor must be aware of this occurrence.

Egg allergy – the protein that cause allergic reaction is located in the egg white. Only a lesser reaction comes from the egg yolk. However some individuals may have a reaction to any part of the egg including the cracked egg shell. Shellfish allergy comes from the muscle protein located inside the shell. The main allergic symptom is a choking effect, including the symptoms mention above
