From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (786) 491-5072

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

Wound Healing --- Part 1

Submitted by: Beatrice Ramsey

Most of us take wound healing for granted. If you get a small cut, you may clean it and cover it with a bandage or leave it open to air and move on with your life. However, under that bandage or that open air wound, is a series of events designed to heal wounds big or small. The skin is the first line of defense, for preventing invasion of unwanted germs, to enter the body. Keep in mind, there are other ways for germs to enter the body. Our lesson will focus on external wound healing. When your skin is cut, scraped or punctured, bleeding will start. Within seconds blood cells start to clump together and clot, protecting the wound and preventing further blood loss. These clots, which turns into scabs as they dry, are created by a type of blood cells called platelets. The clot also contain a protein called fibrin, which forms a net to hold the clot in place.

INFLAMMATION: Once the wound is closed with a clot, the blood vessels can open a little allowing fresh oxygen and nutrients, to enter for healing. White blood cells take on the role of wound protector. This type of cells fights infection and oversees the repair process. Continue with wound healing – Part 2 next week.
