From the Minister's Desk

To our distinguished visitors:

We are honored to have you worship with us! We'd love to get to know you better, share our mission and vision as a church and explore how you can become a part of our family.

If you, any member of your family or friends you know of are interested in becoming a member of the Liberty City Church of Christ, please contact any member of the Liberty City Church of Christ and they will direct your request to our Evangelism Ministry Leaders or you may call our Evangelist directly, Eric W. Doss (786) 491-5072

We are regular people from all walks of life. We are imperfect. We have strengths and weaknesses. But we love a perfect God, who sent the greatest example, Jesus Christ, and we want to spend eternity with Him.

We hope you will join us on this journey.

Understanding Heart Problems Symptoms: Part 1

Submitted by: Beatrice Ramsey

Not all heart problems come with clear warning signs. There is not always an alarming chest clutch followed by a fall to the floor, like you see in the movies. Some heart symptoms don't always happen in your chest, and it is not always easy to tell what's going on. The more risk factors you have, makes you more concerned about anything that might be heart – related. Some risk factors include 60 years or older, overweight, have diabetes, high cholesterol, high blood pressure and stress. Remember, chest pain is the awakening sign, you may be having a heart attack. You will feel a tightness or heavy pressure as though someone is standing on your chest. Other symptoms in the chest may feel like a pinching or burning sensation. It may happen while you are resting or doing something physical. If it is just a brief pain or if it's a spot that hurts more when you touch or push on it, then probably it's not your heart. But don't take any chances, call your doctor. If it becomes severe, call 911. Keep in mind, you can have heart problems without chest pains. This is more common among women. Other symptoms such as nausea, indigestion, heartburn or stomach pains are seen more frequent among women than men. *Part 2 continuing with symptoms.*
