EVANGELIST ERIC W. DOSS, MFT
A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

How Cold Weather Affect Certain Illnesses

Cold weather can significantly impact heart health, by causing blood vessels in the skin and extremities to constrict (narrow) for conserving body heat. This reaction put extra strain on the heart. Because the heart has to work harder to pump blood through constricted blood vessels. Resulting in high blood pressure from reduced blood flow to the heart. This can activate a potential heart attack or stroke for people with existing heart problems. **Good to know:** Cold weather can increase the risk of blood clots, also interfering with normal blood flow.

Cold weather can worsen arthritis pain, by causing the synovial fluid in joints to thicken, leading to increase stiffness and reduce mobility. This occurrence make joints feel 'sluggish' and more prone to pain. Normally, synovial fluid keep all joints lubricated to prevent friction for easy movements eliminating pain.

Cold weather can affect people with diabetes, by causing blood sugar levels to rise from the body releasing stress hormones, that reduce insulin production and increase blood sugar levels. Stay warm at your comfortable body temperature, to manage cold weather illnesses.
