TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

How The Body Control Temperature

The body is remarkable, designed to control and maintain all body functions. God made the human body, putting everything in place, for daily living. The brain, our body's control center is in charge, making all bodily decisions whether it's mental or physical. The hypothalamus a small gland in the base of the brain, control body temperatures. It is similar to our thermostat that regulates the temperature inside the homes, vehicles and businesses. Our bodies respond to internal (diseases) and external (hot or cold weather and exercise) stimuli, making adjustments to keep the body within one or two degrees of 98.6F.

The skin gathers information on weather conditions, immediately transfer information to the hypothalamus. Instructions are given to either release sweat for cooling or shivering to generate heat.

The body has two ways of controlling body temperature. Blood vessels are open wider for heat to escape from other parts of the body for cooling down. The other way for controlling body temperature, blood vessels are narrow to reduce heat loss in cold weather.
