A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

## TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

# Aging of The Brain

The brain is the control center for maintaining all mental and physical human functioning abilities. It's unique status, place humans high above all other species on earth. However, life has a declining period. In our 30's and 40's, the brain starts to shrink, with the shrinkage rate increasing even more by age 60. Like wrinkles and gray hair that start to appear later in life, the brain's appearance starts to change also, with the brain's cognitive abilities becoming altered. The brain's volume decreases overall with age. Specific areas of the brain responsible for cognitive functions, shrink more than other areas.

The areas of the brain that experience the most dramatic changes with age, are also among the last to mature in adolescence. This has led scientists to propose a 'last in, first out' theory of brain aging.

But contrary to the old saying, you can't teach an old dog new tricks, is not completely true. There is growing evidence that we can and do learn throughout our lives. Neuroscientists are learning, as we age our brains are able to reroute neural connections to adapt to new challenges and tasks. While there is no way to stop aging, you can help support your brain health, by staying active, eating healthy and talking to your doctor about your concerns.
