## TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

# Understanding The Body's Waste Elimination System

The human body removes waste products through a combination of organs and processes including the kidney's filtering fluids causing urine production. The lungs exhale carbon dioxide, the skin sweats and the large intestine eliminates solid waste. The kidneys and urinary system help the body to eliminate liquid waste called urea. When all foods and liquids are broken down for nutrients, the unwanted nutrients are liquidated (urea). It is carried in the bloodstream to the kidneys, where it is removed along with excess water from the body, in the form of urine.

To survive, cells need a constant supply of energy, nutrients and oxygen along with the ability to remove waste products. Carbon dioxide is the waste product of cellular activities, eliminated by exhaling from the lungs. Cells are the smallest and hardest working unit in the body. The skin eliminates waste products by sweating. Which help to eliminate excess water, salts and small amounts of urea. The large intestine absorbs water and minerals from undigested food, transforming the waste into a solid form. Stored in the rectum, the lower part of the large intestine until time for elimination.
