TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

EVANGELIST ERIC W. DOSS, MFT

A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

Health Challenges of Chronic Diseases

Hypertension (high blood pressure): Whenever your heart pumps a lot of blood and you have narrow blood vessels, that can't handle a large amount of blood, your pressure within your blood vessels will increase, because of the force from the fast heart beats. Things that can cause your blood vessels to decrease in size, refers to plaque formation inside on the walls of your blood vessels. This occurs from foods eaten over a long period of time. Hypertension is a serious and fatal disease, that must be monitored daily. Notify your doctor immediately, when your blood pressure readings remains 20 or more above your normal daily readings, after taking medications with a 30 or 45 minutes of rest. This could be a sign that something is wrong.

Heart Disease: A health condition that is caused by decrease deliverance of oxygenated blood, to the heart. The heart, like all muscles requires oxygen to power its contractions and relaxations. This process is essential for the heart to pump blood effectively. Remember, the heart is pumping harder due to slow and less amounts of circulating blood throughout the body. This can cause other complications like blood clots, chest pains and other organs failure, left untreated can be fatal. Part 2 next week
