# Life – Threatening Fungal Infection

A life-threatening fungal infection, is a severe infection that can cause serious illness and even death. If a fungal infection is left untreated or not adequately treated, for a long period of time, complications will occur. When the fungal infection enters the blood stream, sepsis will occur. This is the body's sudden life-threatening response to a serious infection. It is a medical emergency requiring a rapid diagnosis and treatment. It can spread to other parts of the body, affecting vital organs like the lungs, heart, brain and kidneys. Fungus are all around us. Their microscopic spores are on the ground and in the air. **KEEP IN MIND:** some level of fungi is present on everyone's body. It only becomes a reason for concern, when it turn into an infection. At this stage, the fungi is visible.

When a fungi is inhaled and enters your body or introduced into your body in another way, the risk of infection rises, especially if you have a problem with your immune system. Because you are likely to develop sepsis, your defense system is poor. **GOOD TO KNOW:** Fungal infections on or in your skin can look red, swollen or bumpy. Fungal infections in your nails can make them discolored (yellow, brown or white) thick or cracked. To completely eliminate fungus, a combination of treatments are required. Such as anti fungal meds, topical cream and sometimes laser therapy. It's crucial to complete the full plan of care to prevent life threatening problems.

MANY PEOPLE REJECT JESUS  
BECAUSE OF BAD EXPERIENCES  
WITH RELIGIOUS PEOPLE.

BUT, HERE'S THE THING... JESUS  
HAD BAD EXPERIENCES WITH  
RELIGIOUS PEOPLE, TOO.

IN FACT, THEY KILLED HIM.  
PEOPLE WILL LET YOU DOWN.

JESUS WON'T. ✝

Heal.  
Because we  
have children  
who don't deserve  
the broken version of us.
