TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

EVANGELIST ERIC W. DOSS, MFT

A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

Strep Throat

Strep throat is a bacterial infection that can make your throat feel sore and scratchy. Strep throat is different from other cases of sore throat, which occur due to a virus. It is contagious, although some people with the infection don't have all symptoms or look sick. But even if you don't have symptoms, you can easily spread the infection to others. **REMEMBER:** people who have symptoms or appear sick are more contagious than people who don't have all symptoms. Early symptoms include – a painful red sore throat, white spots or streaks of pus on your throat, tiny red spots on the roof of your mouth, chills and fever, headache, difficult swallowing, loss of appetite, nausea and vomiting.

GOOD TO KNOW: one symptom strep throat doesn't normally cause is a cough. If you have a cough and other cold symptoms, you probably have a viral infection not strep throat. The bacteria that cause strep throat often live in your nose and throat. When you sneeze or talk, you can spread the infection through respiratory droplets to others. When they breathe in the droplets, touch something that contains the droplets and then touch your nose or mouth, share personal drinking items. The time between when you get infected and when symptoms develop is 2 to 5 days. Antibiotics eliminate symptoms.
