TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

EVANGELIST ERIC W. DOSS, MFT

A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

ENCEPHALITIS

Encephalitis (en – sef – uh – lis – tis) is inflammation of the brain. It can be caused by a virus, bacteria, fungus, parasites or by immune cells mistakenly attacking the brain. **GOOD TO KNOW:** viruses that lead to encephalitis, can be spread by insects such as mosquitoes and ticks. Remember, several years ago, we had a serious outbreak of the Zika Virus from mosquito bites. This virus replicates (making exact copy of the virus) in adult human brain tissue, interfering with memory causing encephalitis. During pregnancy, this virus causes serious birth defects with the fetus head and brain. When inflammation of the brain is caused by an infection, it is known as infectious encephalitis. When the disease is caused by the immune system, attacking the brain, it is known as autoimmune encephalitis.

Remember, encephalitis can sometimes lead to death. Getting diagnosed and receiving treatments right away is important, because it's hard to predict how encephalitis may affect each person. But people will have a combination of symptoms. Autoimmune encephalitis may cause different symptoms such as confusion, seizures, changes in sight and hearing. They will also have loss of feelings, unable to move certain areas of their body. Infectious encephalitis will cause flu – like symptoms, headaches, fever, muscle and joint pains, tiredness and weakness, unable to move certain areas of the face and body, these symptoms become more severe in hours and days.
