TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

Hepatitis A

Hepatitis A (formerly known as infectious hepatitis) is a virus that causes infection of the liver. The disease is fairly common and rarely fatal. However anyone can get Hepatitis A, infants and young children tend to have very mild or no symptoms. Also, they are less likely to develop jaundice than older children and adults. **GOOD TO KNOW:** not everyone who is infected will have all of the symptoms. Hepatitis A enters through the mouth, multiplies in the liver, and is passed in the stool. The virus is spread when an infected individual does not wash his / her hands after using the bathroom. The virus enters another person when hands, food, or objects contaminated with stool are put in the mouth. In some cases. It can be spread by consuming water or shellfish contaminated with sewage.

REMEMBER: Hepatitis A is not spread by kissing, sneezing or saliva. Symptoms include nausea, tiredness, poor appetite, fever, diarrhea and vomiting. Urine may become darker and jaundice (yellowing of the skin and the white part of the eyes will become yellow) may appear. Symptoms may appear two to six weeks after exposure. Most people recover within three weeks, without any complications. Once an individual recovers from Hepatitis A, they are immune for life and do not continue to carry the virus. There is a Hepatitis A vaccine, recommended to all children between 12 to 23 months of age and all international travelers. Prevention includes vigorously hand washing with soap and water, after toilet visits, caring for an infective person and before eating or food preparation.
