TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

Medically Speaking: The Difference Between COVID – 19 And The Common Cold

COVID – 19 and the common cold are respiratory infections caused by different viruses, with the same ways of transmission into the body. However, a common cold is different from COVID – 19, because it can also be caused by a bacteria. In severe common cold cases, treatments may require antibiotics that are designed to eliminate a bacteria. But no antibiotic can eliminate a virus. Antiviral medication is required to eliminate a virus. Keep in mind, a virus is the most common cause of a cold. Generally a common cold symptoms are milder—coughing, sneezing, runny nose, sore throat, poor appetite and decrease sleeping time than COVID – 19 symptoms. Most people get better from a common cold in 7 to 14 days from first symptom.

However, some colds can last longer depending on age and present health status. COVID – 19 has more severe symptoms in addition to a common cold – fever, difficult breathing, confusion, nausea / vomiting, some maybe hospitalized due to pneumonia, organ failure, chest pains and respiratory failure. While most people with COVID – 19 will recover after a few weeks, others will have long term symptoms or complications up to 3 months or longer time. **GOOD TO KNOW:** Each time a person is infected with COVID – 19 or have chronic illnesses, they have a risk of developing long haul COVID – 19. During this time health disability can occur, from persistent symptoms and organ deteriorations.
