LIBERTY CITY CHURCH & CHRIST

TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family. If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders. Alternatively, you can reach me directly at (786) 491-5072. We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!
-Evangelist, Eric W. Doss

EVANGELIST ERIC W. DOSS, MFT

A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

Sepsis is a life – threatening health condition, occurring when the body's immune system overreact to an infection. Untreated accelerates to a dangerous degree, severely damaging tissues and organs. Septic shock will occur leading to organ failure and death. However, most infections do not lead to sepsis. But once an infection turns septic, time is of the essence for treading the condition. In septic shock, you have very low blood pressure and rapid heartbeats, leading to enlargement of the blood vessels to get more blood to affected organs, with deliverance of oxygen. This can lead to a weakening of the heart and a decrease ability to pump enough blood, thereby worsening the situation.

Remember: The heart is a critical indicator of the body's response to a very intense infection and is a key factor in the prognosis of health status. Also during septic shock is the presence of pulmonary failure, less amount of oxygen inhalation and carbon dioxide exhalation. Symptoms includes – rapid heart rate, fever shivering or feeling very cold, confusion, difficult breathing, extreme pain or discomfort, clammy or sweaty skin. SEPSIS IS A MEDICAL EMERGENCY. If you or someone you know has an infected wound that is getting worse, contact your doctor immediately.
