TO OUR DISTINGUISHED VISITORS

We are honored to have you worship with us! It's our joy to get to know you better, share the mission and vision of our church, and explore how you can become a part of our growing family.

If you, any member of your family, or friends you know are interested in becoming a member of Liberty City Church of Christ, please reach out to any member of our church, and they will direct your request to our Evangelism Ministry Leaders.

Alternatively, you can reach me directly at (786) 491-5072.

We are regular people from all walks of life—imperfect with strengths and weaknesses. But we serve a perfect God who sent the greatest example, Jesus Christ, and we desire to spend eternity with Him.

We invite you to join us on this transformative journey!

-Evangelist, Eric W. Doss

EVANGELIST ERIC W. DOSS, MFT

A licensed Prepare & Enrich Marriage Consultant. Has preached across the country and on foreign soil conducting meetings, workshops, lectures, symposiums, and conferences. Has been a cherished shepherd with embodying unwavering commitment and leadership

Beginning Insulin Therapy

Insulin is a hormone produced by your pancreas. It helps your body store and use carbohydrates found in food. When you eat, food is broken down into sugar (glucose), which enter your blood stream, causing a rise in blood sugar. The pancreas responds to this rise in blood sugar by releasing insulin. **Remember**, insulin's main function is to regulate blood sugar by allowing glucose to enter cells, for energy or to be stored for later use. Keep in mind, cells are considered the "Hard Workers" of the body, because they perform ALL the essential body functions necessary for life survival.

Your doctor will determine which form of medication you will need, according to your A1C blood glucose level. The normal range is less than 5.7% no medication is needed, 5.8% - 6.4% is prediabetes (type 2) -possible oral medication with diet restrictions, 6.5% and higher – diabetes, insulin amount and diet restrictions will be recommended by doctor. These ranges may vary slightly depending on factors such as age, illnesses and medications.
